

## Research & Innovation Internships 2025

### Kickstart Your Career with Us!

We are offering 2 internship opportunities for ambitious undergraduate and master students in the following fields:

**Transport Planner/Engineer:** As a Transport Planner/Engineer, you will work on real-life projects aimed at improving the efficiency and sustainability of transportation systems. You will get involved in the launching of a new on-demand mobility service, fleet scheduling and routing methods, transport and travel demand data analysis, and identification of solutions to improve traffic in our cities. Skills you will develop transport planning, mobility services design, data analysis, transport modeling and optimization.

**Software Developer:** As a software developer intern you can get involved from backend to frontend web and mobile developments. You will work on the development of a state-of-the-art on-demand mobility platform that matches travel demand to transport supply. You will participate in the development, testing, and maintenance of the software applications. You will collaborate with senior developers, contribute to coding tasks, debug applications, and support user experience enhancements. Skills you will develop: coding (e.g., Python, JavaScript), software testing, agile development methodologies, problem-solving.

**Marketing:** In this role, you will get involved in developing marketing strategies, digital and offline campaigns. Research results will be provided to you describing customer's preferences and feelings and you will get involved in translating these results into messages and campaigns to promote transport sustainability and alternative mobility solutions. You will work on social media content, design promotional materials, and support brand positioning initiatives. Skills you will develop: digital marketing, branding, market research, campaign management, content creation.

**Business Administrator:** As a business administrator intern, you will be involved in day-to-day business operations, helping to streamline processes, organize resources, and support project management activities. You will participate in administrative reporting, planning meetings, and the coordination of internal operations. Skills you will develop: organizational management, operations coordination, business analysis, teamwork.

Don't miss the chance to gain hands-on experience, expand your network, and strengthen your skills!

### Apply today and shape your future with us!
